# Chat AI admin area

## How to log in to the admin panel?

Open <https://ai.supportdatabases.com/signin> and enter your email address.

Then open <http://mail.ai.supportdatabases.com> and log in.

Login:

Password:

Here you will see a list of mails and one of them is yours, so you need to find it and click "Sign in".

## Navigation.

The admin area has next pages:

1. Inbox - A page that contains a list of initiated chats.
2. Agents - On this page you can manage agents. An agent is an AI assistant that gives responses based on connected datastores.
3. Datastores - On this page you can manage datastores. A datastore is a container that holds different type of datasources (files, web pages, etc...).
4. Settings - On this page you can set up your personal information like name, email etc.

## Inbox page.

All chats you can find on this page. There are 4 tabs:

1. Unresolved - Chats that are not marked as resolved.
2. Unread - Chats that have new messages.

3. Human Requested - Chats where a user clicked on the "Request human" button.

4. All - All chats

# Support lifecycle.

1. A user write a message to the AI chat.

2. A conversation is being created and the AI assistant writes a response automatically.
